

MovementRx for Cincinnati Children's OT/PT

A Digital Care Partner Built for Pediatric Physical & Occupational Therapy at Scale

MovementRx is a Remote Therapeutic Monitoring (RTM) platform co-founded in 2018 by practicing physical therapists Dr. Andrew Gorecki (PT, DPT, FAFS) and Dr. Ben Fuson — built before RTM billing codes even existed, to solve the adherence problem. We bring together custom home exercise programs, patient-reported outcomes, integrated RTM billing, and optional licensed provider monitoring into one clinician-built platform serving pediatric and adult populations across PT, OT, and SLP.

What We Offer

- ✓ **Custom HEP library**
10,000+ HD exercises across PT, OT, SLP, AT. Custom video in under 20 seconds.
- ✓ **Pediatric-ready platform**
Caregiver app, your therapists on camera, gamified engagement for young patients.
- ✓ **PRO tools with motion capture**
ODI, NDI, DASH, LEFS, KOS, PROMIS-CAT, AI summaries, department rollups.
- ✓ **RTM fully integrated**
Automated billing timer. All six 2026 codes generated monthly. No added burden.
- ✓ **Remote monitoring team**
U.S.-licensed PT/PTA team handles all monitoring — zero added work for your therapists.
- ✓ **Any web-based EMR**
Epic, Cerner, WebPT. SSO via SAML/Okta. Joint Commission and HIPAA compliant.

Why We Are Different

- ✓ **Founded 2018, pre-RTM**
Built to solve adherence — not to capture billing codes. 15+ years clinical ownership.
- ✓ **Provider-owned, not PE**
Dr. Gorecki and Dr. Fuson still practice. Roadmap answers to outcomes, not investors.
- ✓ **Three monitoring models**
Software only, co-managed, or full-service. Most vendors give you one option.
- ✓ **NIH-backed research**
Grant 1R44 HD120281. Data from 3,292 patients. APTA PPS speaker 2024 and 2025.
- ✓ **Transparent pricing**
3 clear tiers. Invoice only on reimbursement. No upfront cost, no financial risk.
- ✓ **Dedicated support**
Weekly onboarding, monthly check-ins, client success team. We stay in it with you.

Specifically for Cincinnati Children's OT/PT

200+ therapists across 12+ locations. PT, OT, and SLP on one platform. 78% patient adherence vs 30% nationally. 35% average functional improvement. 100/100 MIPS achieved. Department-level outcomes for payer negotiations. Epic-compatible with SSO. Monthly billing codes generated across every location. NIH grant 1R44 HD120281 validates the approach.
